

Prescription for Establishing Fair Voting
Knowing The Beliefs of Candidates
Opening Positions for Challenge!

Changing the Dynamics for Voting

Know - Those who are Pro-Life and Elect Them.

True conservatives believe abortion is wrong; that killing pre-born people is offensive to the dignity of mankind and should be seen as a crime punishable by law.

Our present elected officials not only permit, but commonly approve of death of the innocent by abortion. They know and sanction this evil.

A **candidate questionnaire** for National, Regional and Local Elections can be researched and placed on websites of Pro-Life and other Conservative Organizations or Individuals. These web sites can be promoted in various fashions – Billboards, Candidate Positions Forms (per sample for the State of Alabama) which can be distributed door to door, at shopping centers, around high school and college campuses, and in lawful or any just way the information can be promoted.

Pre-Election Candidate Disclosure Information

in ballot format can be found at: Fair-Elections.com

No political issues are of more importance than those shown.

If candidates have reasonable intelligence, with sound moral principles, and are both honest and sincere in their efforts to avoid evil, they will readily permit input from those more qualified in particular fields and observe proper humility realizing that others may have important knowledge.

The observance of moral principals is of more importance than political sensitivity.

The web page includes Two forms or concepts for pre-election candidate positions:

1. The one linked near the top is intended for Pro-Life and other conservative groups.
2. The second form found later on the web page is intended as an example of what should be published by county or local registrar offices which is then to be placed on the Internet, kept updated, and have final distribution, in the mail, to all registered voters two to three weeks prior to an election date.
